

Why?

Netherlands 3D

Open code, open data platform

Marcel Duffhuis & Arjan Koelewijn / City of Utrecht

**Gemeente
Amsterdam**

Munich | September 12th

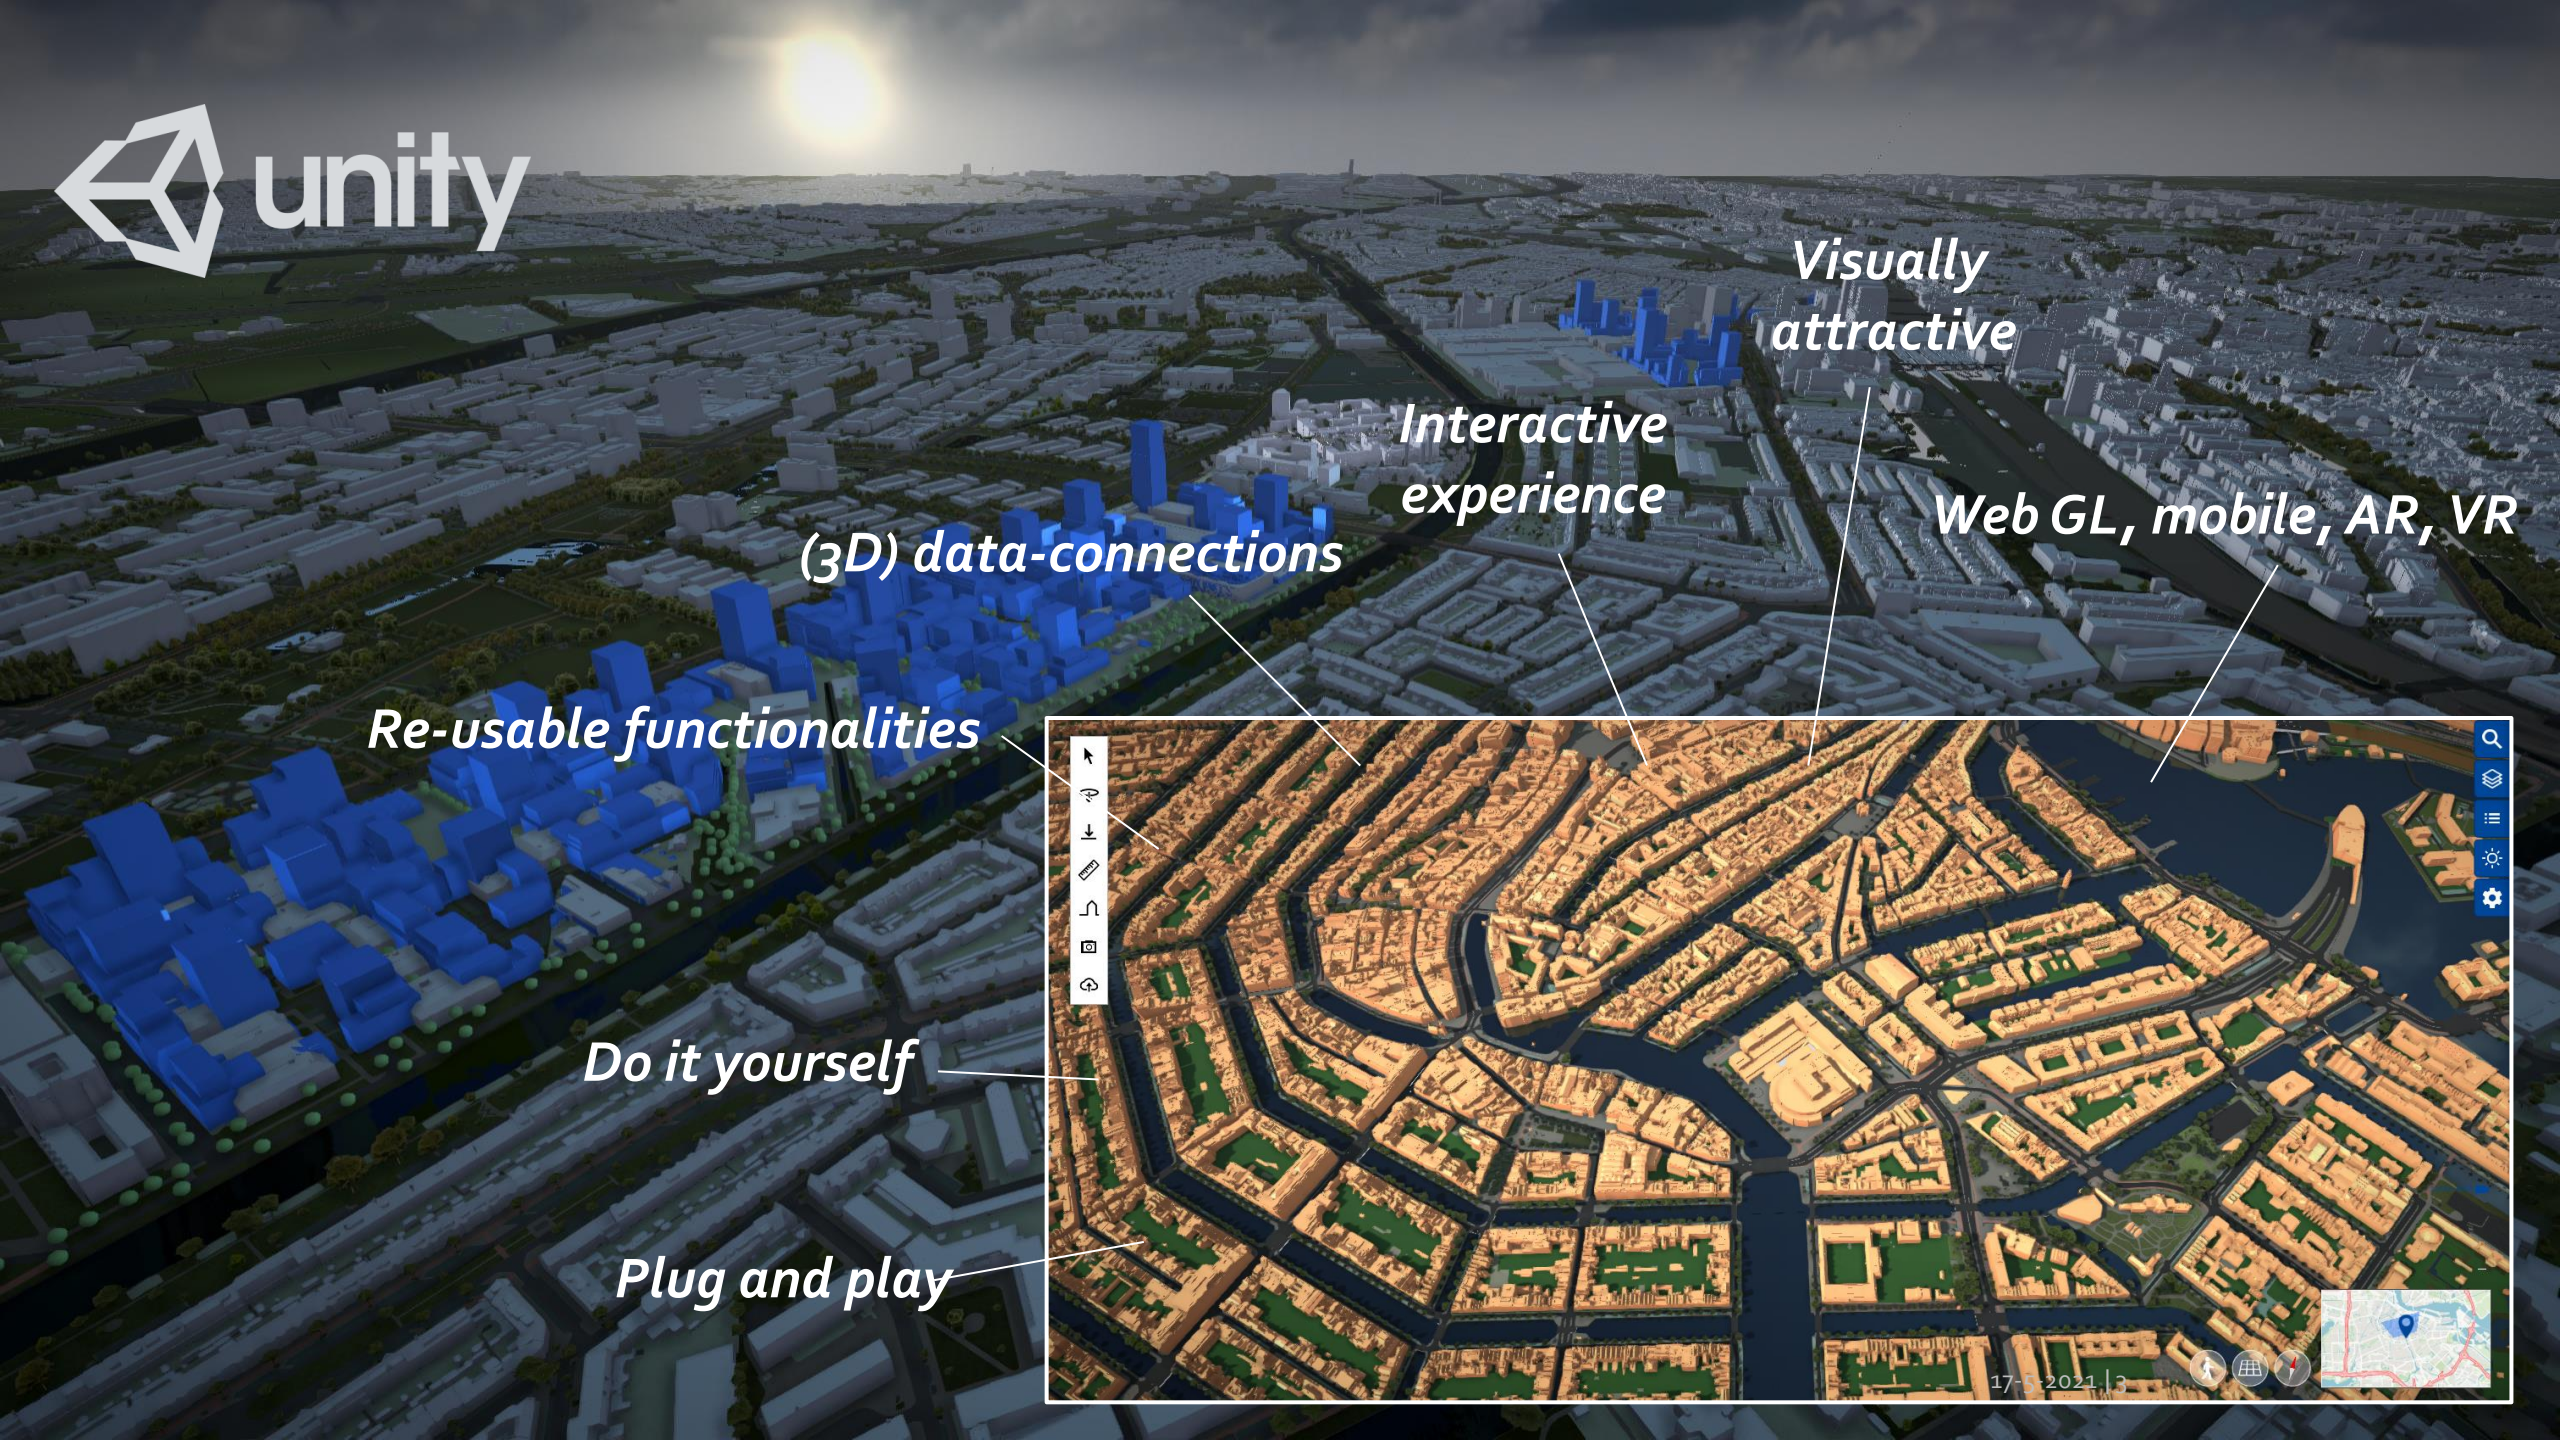

“Digital experience of the City”

3D Utrecht mission

Open code & open data community for municipalities and national governments

- Everyone has access to the basic Digital Twin
- Added features are available for everyone
- Companies are welcome to co-develop
- Be connected to the Dutch game-development scene (and its students)

Visually attractive

Interactive experience

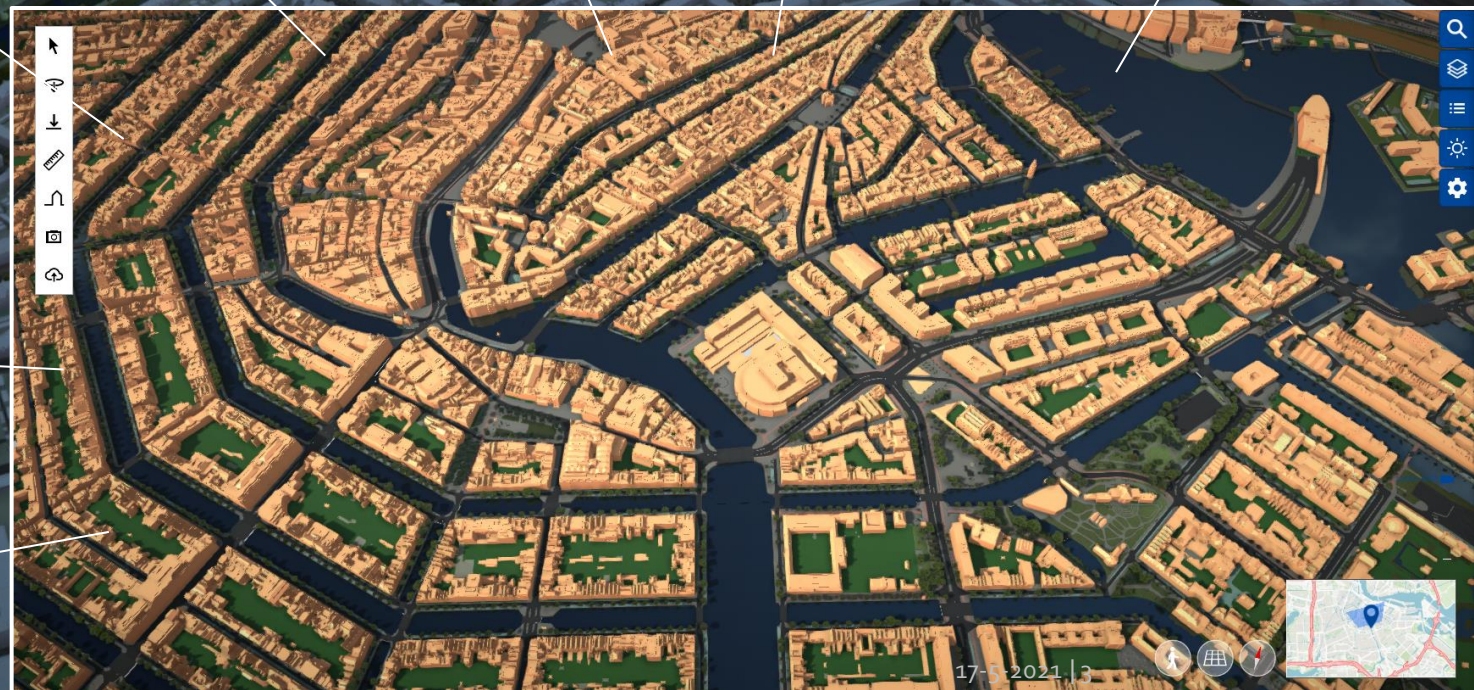

Web GL, mobile, AR, VR

(3D) data-connections

Re-usable functionalities

Do it yourself

Plug and play

“Visually attractive”

An aerial 3D rendering of a city, likely Utrecht, with a river winding through it. A cluster of buildings in the foreground and middle ground is highlighted in a vibrant blue color, while the rest of the city is rendered in a light grey/white color. The sun is visible in the upper left corner, creating a bright glow and casting long shadows across the city.

"Demo time"
